

Description

- Write a program to get the input as integer and create a method get Toy(int price) which uses switch case to display the toys with respect to price.
- Insert the price through console input from the user and pass it to get Toy method
- If the price is not matching display No Toys Available in this Range.

Instructions :

- Ensure your code compiles without any errors/warning/deprecation
- Follow best practices while coding
- Avoid too many & unnecessary usage of white spaces (newline, spaces, tabs...), except to make the code readable
- Use appropriate comments at appropriate places in your exercise, to explain the logic, rational, solutions, so that evaluator can know them
- Try to retain the original code given in the exercise, to avoid any issues in compiling & running your programs Always test the program thoroughly, before saving/submitting

Warnings :

- Take care of white space/trailing white space
- Trim the output and avoid special characters
- Avoid printing unnecessary values other than expected/asked output
